DETAILED ACTION

Claim Objections

1. Claims 8-15 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and/or cannot depend from any other multiple depend claim. See MPEP § 608.01(n). Accordingly, the claims 8-15 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 8-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by St. Germain et al. (U.S. 5,534,007).

Note in figures 1-3, a catheter (5) sized and configured for introduction into a blood vessel; a carrier (15) configured to carry a stent (35) during introduction of the catheter (5); a release wire (45) causes to retain the stent (35) on the carrier

(15) and also selectively release the stent (35) from the carrier (15) for deployment in the blood vessel (65) by pulling on an actuator (110); and a sheath (40) movable in distal direction to enclose the stent (35) and in proximal direction to uncover and expose the stent (35) for deployment.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kony et al. (U.S. 5,830,229) discloses a hoop stent with releasing wire and Robinson et al. (U.S. 5,733,325) discloses a graft assembly for securely positioning a graft.
